## College of Animal Chiropractic's Continuing Education Seminar Series

### Quadruped Basic (Logan) Technique March 18 - 19, 2010

Classes Taught by Dr Dennis Eschbach. This Course is Approved by the Kansas Board of Regents. Application has been made to the AVCA and IVCA for 12 Hours of Continuing Education Credits.

"For millions of years, probably throughout the entire history of the world, there have been existent all of the elements with which to contrive all things of present-day advantage to humanity; but not until they were correlated or combined did they become of outstanding value. This is equally true of many known facts pertaining to the human body which remained of little value until correlated or combined in such a manner as to, for the first time, provide for the consistent and intelligent elimination of man's greatest enemy, body distortion, and its product, DISEASE. " Dr. Hugh B. Logan

To **Hugh B. Logan**, who began his chiropractic studies in 1915, **Chiropractic Philosophy** promised a correction of all subluxations and ailments, both chronic as well as acute. Years after graduation, however, he discovered that his chronic ailments and subluxations were but slightly changed or reduced. He therefore concluded that the results accruing from Chiropractic procedures fell short of the tenets of its Philosophy. Dr. Logan began investigating, and in 1923, temporarily left his practice to further study his discovery: that abnormal body support, which permits the body of the lowest freely movable vertebra to change in its relationship with the sacrum in accord with the law of gravity, was the main reason any known method failed to consistently reduce distortions. The conclusion of his studies resulted in the **PRIMARY PREMISE OF BASIC TECHNIQUE**:

**"THE BODY OF THE LOWEST MOVABLE VERTEBRA ALWAYS ROTATES TOWARD THE LOW SIDE OF THE SACRUM OR THE FOUNDATION UPON WHICH IT RESTS, AND ROTATES TOWARD THE HIGH ILIAC CREST WHEN THAT CREST IS HIGH AS A RESULT OF SACRAL SUBLUXATION. "**

**Come Join Us for Some Work and Fun! You'll Be a Better Doctor For It!**

THURSDAY (8 Hrs) 9:30 pm - 6:30 pm	FRIDAY (4 Hrs) 8:30 pm - 12:30 pm
9:00 - 9:30 Registration and Breakfast	8:30 - 9:30 Examination and Treatment Using Quadruped Basic Technique: Theory (cont.)
9:30 - 12:30 History and Theories of Quadruped Basic Technique (Based on Logan Technique)	9:30 - 12:30 Laboratory Two: Examination and Treatment of the Equine and Canine Using Quadruped Basic Technique
12:30 - 1:30 Lunch	
1:30 - 4:30 Theories of Quadruped Basic Technique (cont.) & Examination and Treatment Using Quadruped Basic (Logan) Technique: Theory	7:30 - ? <b>BAR-B-QUE AND BONFIRE! BRING YOUR APPETITES, STORIES, JOKES AND SONGS...WE'LL HAVE A GREAT TIME!!!</b>
4:30 - 6:30 Laboratory One: Finding and Applying the Apex Contact
